PROFILE

I am a web developer proficient in HTML, CSS, JavaScript, React, Python, FastAPI, Flask, and SQL. I possess a collaborative mindset, am a fast learner, and maintain discipline in my work. With a strong foundation in these technologies, I excel in team environments, contributing effectively and adapting to new concepts rapidly. My disciplined work ethic ensures the timely delivery of high-quality results. Overall, I am a versatile web developer with a collaborative mindset, quick learning abilities, and a focus on excellence.

EXPERIENCE

SCHOOL PROJECTS: Scrum-Master & Project Contributor

- Led and coordinated different projects as the scrum-master, ensuring successful completion.
- Designed database models for the projects to optimize data storage and retrieval.
- Assigned roles and responsibilities to project members, ensuring efficient teamwork and collaboration.
- Set up and managed GitHub repositories for version control and effective project collaboration.
- Merged various branches into the main branch, maintaining code integrity and project stability.
- Tracked project progress to ensure alignment between frontend and backend development teams.
- Prepared and delivered engaging project presentations.

PERSONAL PROJECTS: Independent Developer & Project Manager

- Successfully completed several solo projects, demonstrating self-motivation and project management skills.
- Set up development environments to streamline the application development process.
- Utilized Figma to design intuitive and user-friendly interfaces for the applications.
- Deployed applications on multiple platforms, including Netlify and Render, for wide accessibility and usability.
